POL: Discovery of Hydrocarbons in Exploratory Well Khaur North-01 (Khaur Block)

- According to notice issued on Pakistan Stock Exchange Limited (PSX) by Pakistan Oilfields Limited (POL), the Company (operator
 of Khaur Development & Production Lease) has discovered hydrocarbons from exploratory well Khaur North-01 (Khaur Block) to
 the tune of 502 bopd of oil and 1.40 mmcfd of gas.
- POL as operator holds 100% stake in the block.
- Production from Khaur block will not be priced under Petroleum Policy 2012 (PP12) as the block has not been granted conversion under the Supplemental Agreement (SA).
- Based on our estimate, we expect annualized earnings impact of PKR 3.23/share based on oil price assumption of USD 70/bbl and exchange rate of PKR 129 against USD.
- However, management's disclosure highlighting that actual production flows may vary significantly while keeping in view variance in flows from recent discovery of Jhandial (which is in close proximity of Khaur North), we foresee greater probability of actual flows differing from the numbers reported at initial testing.

Recommendation

We recommend a **'HOLD'** call on POL with our Dec-18 target price of PKR 687.1/share, offering +7% upside from last close. The Company is currently trading at FY19F P/E of 7.5x and offers a dividend yield of 9.8%.
